PROFESSIONAL EXPERIENCE

StoneX Financial Group

Chicago, IL

Market Risk Analyst (Promoted)

Dec 2025 – Jun 2026

- **Risk Reporting:** Replaced a manual, judgment-based EOD risk reporting process with a Python, SQL, and API pipeline across 14 fixed-income portfolios, saving 15+ hours of weekly manual effort.
- **Exposure Dashboards:** Designed Streamlit dashboards surfacing 20+ risk and P&L measures (VaR, DV01/CS01, stress, regulatory capital) for 20+ traders and desks.
- **Limit Monitoring:** Added breach highlighting and MBS-funded data to the daily limit report, sharpening breach visibility for traders and correcting data errors to keep DV01 figures accurate.
- **Drilldown Analytics:** Engineered a view across all RiskMetrics levels with cross-metric and historical comparison to trace and attribute each exposure.

Risk Developer

Jan 2025 – Dec 2025

- **Run Controls:** Mapped the end-to-end MSCI RiskMetrics overnight run across 5 source systems and enhanced views and calculations in the SA-CCR/PFE dashboard.
- **Data Quality:** Developed a RiskMetrics-API dashboard surfacing day-over-day value changes and run diagnostics across 15+ metrics.
- **Break Resolution:** Flagged positions erroring for 7+ days to catch CUSIP/ISIN mappings MSCI failed to apply, speeding escalation with the team.

MAK Capital

New York, NY

Quantitative Developer

Oct 2024 – Dec 2024

- **Signal Research:** Built a Python NLP framework analyzing 100+ CEO and leadership-change events into predictive signals for portfolio managers.
- **Feature Pipelines:** Architected Python ETL pipelines that scraped large volumes of news, used LLMs to surface the most relevant events, and pulled market-cap and price data via validated tickers.
- **Quantitative Scoring:** Created a KPI model combining sentiment, performance, volatility, and market-value signals to rank each event's market impact for PMs, with up to 80% accuracy.

Numeraxial LLC

Flushing, NY

Quantitative Analyst (Intern)

May 2023 – Aug 2023

- **Valuation Models:** Constructed models in QuantLib, Excel, and Stata across 8 fixed-income instruments, applying modified duration, convexity, and 95%/99% VaR for interest-rate and credit risk.
- **Beta Hedging:** Managed a \$100K multi-asset portfolio, sizing Micro E-mini S&P 500 futures and options to a 1.5 beta to cut modeled losses in 10% drawdowns.

RESEARCH & QUANTITATIVE PROJECTS

- **Market Regime Detection (Bank of America Capstone):** Applied HMM, LSTM, and SJM models to 30 years of S&P 500 data (93% LSTM accuracy) to classify bull/bear regimes and rebalance a 9-ETF portfolio via mean-variance optimization (Sharpe +12%), assessing risk with VaR and stress scenarios.
- **Trading Signal Backtesting:** Implemented OLS regression across 11 market indices to forecast direction, achieving a backtested Sharpe of 0.63 (TA-Lib, Python).

TECHNICAL SKILLS

Risk & Analytics: VaR, CVaR, Expected Shortfall, Stress Testing, Scenario Analysis, P&L Attribution, Backtesting, Model Validation, Sensitivities (DV01, CS01, Key Rate Duration), SA-CCR/PFE, Basel III, Limit Monitoring.

Quantitative & ML: Statistics, Probability, Stochastic Calculus, Time Series, GARCH, Monte Carlo, Optimization, Machine Learning (Random Forest, HMM, LSTM), Signal Research, Factor Models.

Pricing & Products: Fixed Income, Rates, Credit, Mortgages (MBS), Structured Credit, Options, Futures, FX, Equity Derivatives, ETFs, Greeks, Curve Construction.

Programming & Tools: Python (pandas, NumPy, SciPy, scikit-learn, statsmodels), C++, SQL, R, MATLAB, QuantLib, TA-Lib, Databricks, Bloomberg, FactSet, Excel/VBA, Git.

Certifications: Akuna Options 101 & 201, Bloomberg Market Concepts.

EDUCATION

New York University

New York, NY

M.S., Financial Engineering | GPA 3.7/4.0 | TA, Hedge Fund Strategies

Aug 2022 – May 2024

Coursework: Financial Risk Management (VaR, CVaR, Stress Testing), Machine Learning for Finance, Quantitative Methods (Stochastic Calculus, Markov Chains), Derivatives & Volatility Modeling, Quantitative Portfolio Management (Factor Models, Optimization)

Thadomal Shahani Engineering College

Mumbai, India

B.Tech., Computer Engineering | GPA 9.35/10 (approx. 3.7/4.0)

Aug 2018 – May 2022
